

OFFROAD / SERVICE VEHICLE M4M-7500 PRO

M4M

MINI 4" MODULE
Patent Pending

The OffRoad Energy M4M-7500 (Mini 4" Module) was designed with durability, form, function and style in mind. The modules were designed to fulfill a need for heavy duty OffRoad bumpers and typical OffRoad vehicles used by Search and Rescue and Pro OffRoad race vehicles. With many applications ranging from OffRoad uses to many other environments, structures, and industries. Some of which are service and tactical security vehicles, Security Scene lights for Mobile command posts like FEMA, Police, Security and Military. Large agricultural machinery (Tractors, Conveyors, and processing plants) as well as large industrial equipment.

Because of various inquiries and requests from these industries the M4M has evolved into a truly universal style utility work light. Featuring several mounting options including a removable swivel/tilt mount, tripod, thru bulkhead mounting and Pipe/Conduit. Application and engineering assistance available upon request to demonstrate mounting techniques.

TECHNICAL SPECS

POWER AND OUTPUT for each light module		MECHANICAL For each light module	
DC Driver Input Voltage/s	12VDC or 24VDC	Dimensions (H x W x L)	3.75" x 3.75" x 5"
DC Driver Input Current @ 12VDC	4.5A	Weight	3.5LBS W/ STM
DC Driver Input Current @ 24VDC	2.25A	Housing Material	Aluminum
Watts	54W	Optical Lens	Break and Scratch Resistant HEI Glass
3 rd Party Verified Lumens	7500LM	Wire Gauge	18AWG
Beam Angle	38 Degrees	Connector	Deutsch Tech
		Warranty	Lifetime Limited

NOTE: Our focus is High Output DC Lighting but, we do have AC connectivity which is special order.
